The Satoshi Project

Bitcoin in your hands

The Name

***Satoshi Nakamoto** stands for Bitcoin — something new, something modern. Something that is right and genuine, and feels that way too. Something that connects like-minded people. All of this is embodied in the **coin medals from Satoshi Silver**.*

The Product

*The **expertly crafted concept**, the **technically accurate** and **aesthetically balanced** designs, the realization **through state-of-the-art manufacturing** technology with the **highest precision**, and the craftsmanship embodied in the products inspire not only **collectors** and **Bitcoin enthusiasts**, but anyone who appreciates **true beauty** and **lasting value**.*

Masterpieces of minting art in 999 fine silver

*Quality minting in **21g silver, 1000 sats**,
Diameter: 37mm*

*With a **real crypto transaction** on the Bitcoin network*

***Discover the many small details**
that often only reveal themselves at a second
or third glance.*

***But that's not all** – prepare to be surprised.*

*The topic is already the talk of both the **collector community** and the **crypto community**.*

*Don't waste any time – **order today**:

The Highlights

- 21 grams of fine silver with electroplated precious metal finishing.
- 21g fine weight corresponds to **21 million** micrograms - a homage to the maximum possible number of Bitcoins. You'll also find this value minted on the coin.

- You'll also find the value **1000 Sats** minted on the coin. Just as cents represent the smallest unit of the euro, Satoshis (or Sats) are the smallest unit of Bitcoin.

- **Numbered Limited Editions**

- For each piece, **1000 sats** are transferred to the **Bitcoin Genesis Wallet** via a **collective transaction** (individual transactions for the **Humpback Edition**). This is a **symbolic donation**, and the buyer has no access to the funds. The transaction is **publicly visible and verifiable on-chain**.

➤ Choose your preferred packaging and product presentation:

The innovative ApoPAXX®-packaging:

- modern, compact, and secure
- featuring a high-quality acrylic coin capsule and an integrated display stand
- The transaction hash is printed on the enclosed certificate

The elegant wooden case:

- classic and secure
- featuring a high-quality acrylic coin capsule with a display stand
- The transaction hash is printed on the enclosed certificate

➤ **Limited editions** such as the top model **Humpback Edition** come in a **custom-made acrylic block**, with the **transaction hash** engraved into it and numbering (the numbering can also be found on the product itself).
